AI APPLIANCE 2

ENHANCE YOUR SECURITY WITH NEXT-GENERATION VIDEO ANALYTICS

The AI Appliance 2 enhances the security of your site by incorporating Avigilon Next-Generation Video Analytics on non-analytic cameras. The AI Appliance 2 comes in two models to support up to 60 cameras for site scalability and performance. With its Next-Generation Video Analytic capabilities, the AI Appliance can support: expanded object detection classification, Unusual Activity Detection (UAD), Facial Recognition technology, Avigilon Appearance Search technology, and COVID-19 response technologies.
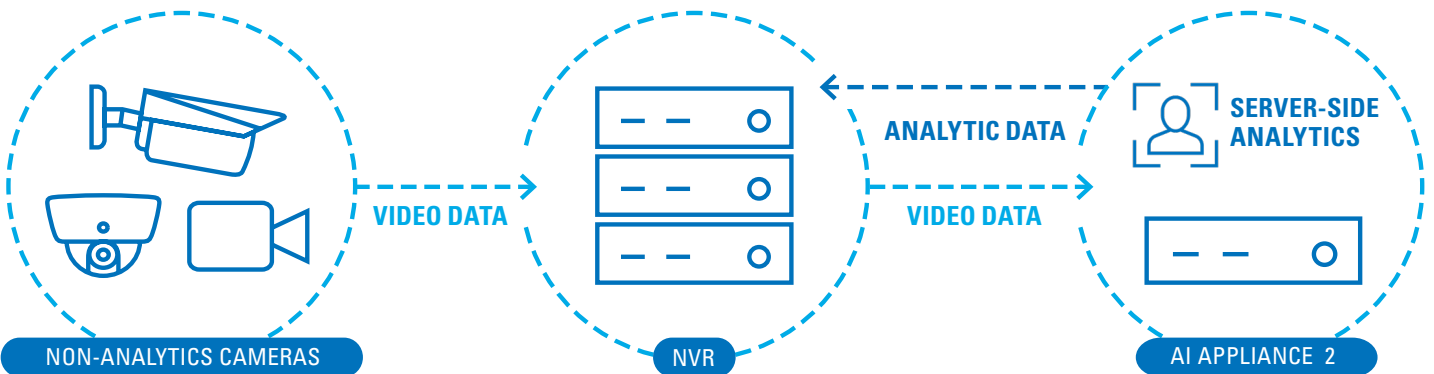

SERVER-SIDE ANALYTICS

Brings Object Detection, Appearance Search, Facial Recognition, Occupancy Counting, and No Face Mask Detection technologies to existing non-analytic cameras.

MANAGED SOLUTION

Setup and configuration can all be managed from within ACC Client. AIA2 also includes 3 years of on-site parts replacement.

ENHANCED SECURITY

AI Appliances 2 runs Avigilon Hardened OS on an encrypted solid state drive to minimize attack vectors.
