

Alta H6A Dual Head

Double the coverage in the cloud

Improve coverage in difficult spaces using the Avigilon Alta H6A Dual Head camera. With adjustable varifocal lenses and IR illumination, this single camera performs the functions of two, significantly minimizing blind spots. Real-time video analytics aid in incident detection.

Do more with less

Get the functionality of two cameras in one powerful dual head form factor. Reduce the total cost of ownership with a single cable run and license while streamlining initial setup.

Custom field of view & zoom

Achieve the ideal perspective with the camera's varifocal lenses, allowing you to customize the field of view. Zoom into a scene for a closer look while preserving evidentiary details.

AI-powered video analytics

Stay on top of what's happening at your site with built-in video analytics and intelligent insights. Show occupancy counting, people flow using heatmaps and save time with Smart Search.

Advanced audio analytics

Expand your real-time awareness with audio alerts for gunshots, breaking glass, screeching tires, and more. You can also record audio evidence if needed with the optional recording.

Trusted and secure

Avigilon Alta video security solutions are built on a cyber-secure platform with ISO/IEC 27001 certification. Safeguard your data with a comprehensive end-to-end security system.

24/7 Connected convenience

Easily view and manage your cameras anytime through a cloud-native platform. Automatic firmware updates keep your devices up-to-date, adding new features and reducing maintenance.
