

ESPRIT ANTI-CORROSION FIXED CAMERA

FIXED ON SAFETY IN ANY WEATHER

The Esprit Anti-Corrosion Fixed camera has been designed to guarantee efficient video security in offshore/onshore marine environments and in ports and roadways. With 40x zoom and full 1080p resolution, the Esprit Anti-Corrosion Fixed camera offers Wide Dynamic Range that produces exceptional imaging quality, while tracking objects in motion and in variable lighting conditions. In addition, the Esprit Anti-Corrosion is rated for IP66/67/68/69, NEMA Type 4X and 6P ratings and Lloyd's Register Type Approval to ensure that sites are always protected, even in wet and treacherous conditions.

RUGGED CONSTRUCTION

AISI 316L stainless steel with micro-shot, electro-polished surfaces offer maximum corrosion resistance.

HIGH-TEMPERATURE RANGE

Optimized to operate reliably even at increased temperature variances: from -40°C (-40°F) up to +65°C (+149°F).

LLOYD'S REGISTER MARINE TYPE APPROVAL

Obtained Lloyd's Register Marine Type Approval for the maritime and shipping sector and complies with the standard for railway applications.

PEACE OF MIND

We back this camera with a 5-year industry-leading warranty.

WEATHER RESISTANT

Rated NEMA Type 4X/6P and IP66/67/68/69 for water, corrosion and dust resistance.

WIDE DYNAMIC RANGE & LOW LIGHT COMPENSATION

Offers excellent image detail in contrasting light and shadows.

ONVIF® COMPLIANT

ONVIF Profile S, G and T compliance allows for easy integration with existing ONVIF infrastructures. Integrates with Pelco VideoXpert and other leading video management systems.
