- ▶ Full indication of all information displayed at the Fire Control Panel
- ▶ Connection via RS485 Control Panel Network
- ▶ 24 programmable function buttons, Selectable based on user account permissions

Description

The Latitude Vision Network Repeater allows a full display and optional control of the Latitude fire alarm control panel from a small and unobtrusive local control station.

Latitude repeaters can be configured to offer full display and control to replicate the functionality of the fire control panel or to operate as a simple, display only device for applications where access to control the fire alarm system would be inappropriate.

For other annunciation and control applications, Latitude can be configured to provide customisable switches and indications for a host of fire system ancillary functions.

Available in several standard formats, Vision Repeater can be mounted directly onto a wall, be recessed using our quick-fix adaptor frame or fully flush mounted.

Specification

Size	235mm (L) x 170mm (H) x 55mm (D)
Construction	1.2mm mild sheet steel
IP Rating	IP 30
Finish	Epoxy powder coated
Colour - Lid & Box	BS 00 A 05 fine texture
Weight	2 kg
