

ExSite Pro Bullet

Affordable security for hazardous sites

Securing hazardous environments is a balancing act: safety is key, but cost-effectiveness is critical. Pelco's explosion-proof camera breaks this cycle, offering high-performance security and reliability without the price tag. Enjoy strong security without straining your budget.

Built for your hazardous site

Meet global explosion-proof and dust-ignition-proof compliance requirements. Built for tough environments, this camera can handle high/low temperatures, water, dust and strong winds.

See what you need to see

This high-resolution camera captures sharp details, day and night. Its built-in IR illuminator provides clear night vision, so you can always see what's happening, even in the darkest areas.

Stay a step ahead of threats

Smart Analytics offers better insights and faster responses with object detection and classification, crowd thresholds, vehicle type differentiation, crawling detection and privacy masking.

Expect more from your camera

Unlock your camera's full potential by enabling Elevate, Pelco's built-in direct camera-to-cloud technology that enhances performance and detection accuracy.

Safeguard your security system

Get peace of mind that your system is secure with advanced cybersecurity features. Set up automatic firmware updates so your camera remains up-to-date with the latest security patches.

Compatible with your system

This camera is ONVIF Profile S, G, T and M conformant for easy integration with leading video management systems, maximizing your existing investment.
